**Potted Christmas trees are best for the environment...**

**Portland, OR**– The potted Christmas tree company of Portland makes it easy for folks to have the greenest Christmas trees! They deliver full size potted trees that get planted to grow old in watersheds. Potted-and-planted trees are best for the environment because they clean the air every day for years after Christmas. If you get one every year that many trees are cleaning the air every day of global warming pollution.

We're the original and only such service in the world. We have info on our website how people anywhere can do a potted tree that gets planted by their parks department. And anyone can franchise our company. Our idea can turn Christmas into a tree planting holiday.

The Original Living Christmas Tree Company (TOLCTC) began in 1992 delivering live trees in pots and has every year since. Thousands of Portlanders living Christmas trees have been planted in parks and landscapes all over the Northwest.

Here's how it works: Folks order their Christmas tree through their website, livingchristmastrees.org. TOLCTC delivers potted full-size evergreen trees to residences and businesses. TOLCTC picks up the trees after New Years. Trees get planted by planting groups such as parks departments, schools and private landowners. The trees are planted to grow old.

The Christmas trees top out at \$100. The trees are naturally shaped, not sheered into cones. They are easy to care for and each tree has a deposit check to make sure planters get quality trees.

Living Christmas trees are 6' or 7.5' size. Clients can choose from ten kinds of cedar, juniper, pine, spruce and fir. The main tree offered is the Douglas fir, the State Tree of Oregon and the most popular tree worldwide. Over 400 trees are arranged to be planted so that many can be Christmas trees.
